TRECCAfrica Scholarships for Africans

African's Scholarships » Postgraduate Scholarships for African Students » Africa University Grants

TRECCAfrica Scholarships for Africans: The TRECCAfrica is funding Postgraduate scholarships to students and staff from various African countries to study at one of the consortium partners.

There are seven full-degree Master's positions, 15 Master's exchanges and seven PhD exchange positions available. The scholarships cover travel costs, tuition fees and a living allowance for a period of up to 10 months and PhD exchanges will be for a period of up to 12 months.

TRECCAfrica programmes range across disciplines such as sustainable development, environmental management, renewable energy, food science and technology, natural resource assessment, climate and society, biotechnology, agro-ecology, soil physics, microbiology and veterinary medicine.

The programme awards scholarships to postgraduate students and staff from various African countries to study at one of the consortium partners.

The academic institutions at which the TRECCAfrica scholarships are tenable are the universities of Dar es Salaam (Tanzania), Ghana, Mekelle (Ethiopia), Nairobi (Kenya), Nigeria and Stellenbosch (South Africa).

TRECCAfrica Scholarships for Africans Eligibility

To be eligible for the Scholarship, masters and doctoral students must:

- Must be a national and/ or resident of any of the eligible countries
- Target group 1 students must be registered or admitted to one of the Higher Education Institutions (HEI) comprising the consortium at the time of application for the scholarship. Eligible students must therefore be registered/ admitted at the University of Ghana, Mekelle University, the University of Dar-es-Salaam, the University of Nairobi, Stellenbosch University and the University of Nigeria (Nsukka).
- Target group 2 students must be registered or admitted at a Higher Education Institution in one of the eligible countries identified in the Intra-ACP call.
- Students are also required to have sufficient knowledge of the language in which courses are offered at the host HEI.

For staff to be eligible for TreccaAfrica scholarships, they need to comply with the following criteria:

- Be a national or resident of the countries covered by the scholarship
- Work at or be associated with a Higher Education Institution
- The assignment of mobility of a staff member must be based on the agreement between partner institutions.
- There must be an agreement between the home and host HEI regarding the modules to be taught by the visiting lecturer, the type of research to be conducted, the type of training to be followed or the administrative tasks to be undertaken.
- Staff mobility may take the form of a direct post-to-post exchange or a one way flow of mobility to or from an eligible country.

Scholarship Open for Students of Following Countries:

Target Group 1: Nationals and/or residents of Tanzania, Ghana, Ethiopia, Kenya, Nigeria and South Africa.

Target Group 2: Nationals and/or residents of other African countries not represented by the TreccaAfrica consortium.

TRECCAfrica Scholarships for Africans - Number of Awards

There are seven full-degree Master's positions, 15 Master's exchanges and seven PhD exchange positions available for study at the TRECCAfrica partner universities.

Master's exchanges will be for a period of up to 10 months and PhD exchanges will be for a period of up to 12 months.

The scholarships include travel costs, tuition fees and a living allowance of €600 per month for Master's students and €900 per month for PhD students.

AYLS117_FAQs (Way Back Machine) What is TRECCAfrica_Simplified

SourceURL: <https://airtable.com/tbl9Vgmxy9rtudCU/viwmLqs0Rm4N6ouzS?blocks=hide>

Author: Rehana Odendaal

FAQs (Way Back Machine) What is TRECCAfrica?

The Transdisciplinary Training for Resource Efficiency and Climate Change Adaptation in Africa (TRECCAfrica) is a consortium of 6 academic higher education institutions in Africa, and 2 associate partners. The consortium provides postgraduate (doctoral and master) training to 72 postgraduate students and 8 staff members in Africa.

Through the support of the Intra-ACP Mobility Scheme of the European Commission working through the African Union, the funds for this mobility scheme will be disbursed over a period of 5 years. Potential candidates cross national and study boundaries, to address the challenges of climate change adaptation and natural resource depletion.

Who are the partners involved in the consortium?

The consortium comprises the 6 academic institutions, with support from two Associated Members, the African Technology Policy Studies Network and the Open Society Foundation. The academic institutions at which the TRECCAfrica scholarships are tenable are the universities of Dar es Salaam (Tanzania), Ghana, Mekelle (Ethiopia), Nairobi (Kenya), Nigeria and Stellenbosch (South Africa). Do I qualify for the scholarship – what are the eligibility criteria?

To be eligible for the Scholarship, masters and doctoral students must:

Must be a national and/ or resident of any of the eligible countries

Target group 1 students must be registered or admitted to one of the Higher Education Institutions (HEI) comprising the consortium at the time of application for the scholarship. Eligible students must therefore be registered/ admitted at the University of Ghana, Mekelle University, the University of Dar es Salaam, the University of Nairobi, Stellenbosch University and the University of Nigeria (Nsukka).

Target group 2 students must be registered or admitted at a Higher Education Institution in one of the eligible countries identified in the Intra-ACP call.

Students are also required to have sufficient knowledge of the language in which courses are offered at the host HEI.

For staff to be eligible for TRECCAfrica scholarships, they need to comply with the following criteria:

Be a national or resident of the countries covered by the scholarship

Work at or be associated with a Higher Education Institution

The assignment of mobility of a staff member must be based on the agreement between partner institutions.

There must be an agreement between the home and host HEI regarding the modules to be taught by the visiting lecturer, the type of research to be conducted, the type of training to be followed or the administrative tasks to be undertaken.

Staff mobility may take the form of a direct post-to-post exchange or a one way flow of mobility to or from an eligible country. What are the different target groups?

Target Group 1 refers to nationals and/or residents registered at one of the institutions comprising the TreccaAfrica consortium. Target Group 1 therefore comprises staff and students registered at the University of Ghana (Ghana), University of Nairobi (Kenya), Mekelle University (Ethiopia), University of Nigeria Nsukka (Nigeria), University of Dar es Salaam (Tanzania) and Stellenbosch University (South Africa).

Target Group 2 refers to nationals and/ or residents of other African countries not represented by the TreccaAfrica consortium or who have received a Higher Education Degree or equivalent in one of these countries. Target Group 2 students may therefore be employed in the public service or at public and private enterprises.

Study fields are dependent on the institution for which you apply. A detailed list of the available programmes (taking into account the eligibility criteria as mentioned above as well as the relevant target group) can be found under the section 'Scholarship Particulars'. What does the scholarship cover?

The TRECCAfrica individual scholarships cover one roundtrip flight ticket, visa costs, participation costs (which may include tuition fees, registration fees and service fees), comprehensive insurance coverage (health, accident and travel) and a monthly subsistence allowance from which scholarship recipients are also to cover accommodation expenses. The monthly subsistence allowance is calculated per mobility option (and can be viewed under the section 'Scholarship Particulars'). Full details on the financial conditions of the scholarship can also be found under the section 'Scholarship Particulars'.

What are the participation and travelling costs involved?

Participation and travelling costs vary, depending on the type of programme which will be pursued under the mobility scheme, as well as the institution and country to which the participant travels. This information is communicated to successful applicants (after having received, reviewed and assessed their applications). What is the duration of the scholarship?

Applications can be submitted for either the pursuit of a full-degree or a short exchange – at both Masters and Doctoral levels. The scholarship covers the entire study period for which candidates have applied.

What are full-degree studies?

Students from one of the six consortium partners enrol as either full-time masters or full-time PhD students at one of the partner institutions for the full duration of their studies. They receive their degree from the host institution.

What are exchanges?

Students registered as full-degree students at one of the six universities comprising the consortium spend a short period (up to 10 months) at one of the other institutions in the consortium and return to their home institution after the exchange period to complete their degree at the home institution.

How do I apply for the scholarship?

Visit the section "Apply now" on the website for instructions on how to complete your application.

Which permits or documentation do I need?

Details of additional documentation needed, or which visa to apply for, are communicated to successful applicants (after having received, reviewed and assessed their applications).

having received, reviewed and assessed their applications.

How do I stay in touch?

Write to us from our online contact form and an email reply will be returned to you, or contact us via telephone. Visit our facebook page to see more about TRECCAfrica.

If you're a successful TRECCAfrica candidate, send an email to treccafrika@sun.ac.za to request access to the LinkedIn networking group for members of the TRECCAfrica scholarship.

The TreccaAfrica individual scholarships will cover:

One roundtrip flight ticket and visa costs for all scholarship holders

A monthly subsistence allowance payable on a regular basis during the mobility period

Mobility Type	Monthly allowance
Masters	€ 600
Doctorates	€ 900
Staff	€ 1000

Acommodation expenses to be covered by the scholarship recipient and can be done from the monthly subsistence allowance.

Participation Costs which may include tuition fees, registration fees and service fees

Comprehensive Insurance Coverage (Health, Accident and Travel)

The TRECCAfrica Scholarship allows candidates from two target groups to participate in the mobility scheme and makes provision for three types of individual mobility for staff and postgraduate (Master's and Doctoral) students.

The types of mobility covered include:

full- degree studies for Masters and Doctoral students;

shorter-term exchanges for Masters and Doctoral students; and

staff exchanges for up to one month.

For details on the mobility distribution on offer for target groups 1 and 2, consult the downloadable document.

Partner Institutions

TRECCAfrica (The Transdisciplinary Training for Resource Efficiency and Climate Change Adaptation) comprises seven research-intensive higher education institutions in Africa, as well as two Associated Partners. The map on the right can be used to view background information as well as particulars about the courses on offer at each of the 7 academic institutions (University of Botswana, will be added to the map shortly).

About Us

TreccaAfrica (Transdisciplinary Training for Resource Efficiency and Climate Change Adaptation in Africa) will provide doctoral and master’s training to 80 postgraduate students in Africa at six leading African Universities to provide the next generation of academics and professionals who will be able to address an interlocking set of real challenges for Africa’s future development: climate change and resource depletion.

Africa’s position in this complex requires unique, transdisciplinary skills and competencies. It is a continent dominated by poverty, contributes relatively little to total greenhouse gasses and in recent years has become the focus of a new global scramble for primary resources as new players like China have entered the game.

It is generally accepted that Africa might well experience the most severe impacts of climate change and is the continent that is least prepared to handle these impacts. To be truly sustainable Africa will need to ensure that it uses its rich resource endowment responsibly to fund investments in human capacity and knowledge infrastructure that will sustain development after the primary resources have been depleted. This, in turn, will establish for Africa

the kind of funding base needed to finance adaptations to climate change.

The skills and competencies in transdisciplinary research methodologies that TRECCAfrica students will acquire and the research network that they will comprise will be able to generate policy-relevant research that tracks resource flows, prices, the use of these resources and flows of resource rents. Such a network will incorporate the various research environments from the six partners involved into a sustainable partnership for climate change and resource efficiency, as co-supervision and staff mobility form part of the project.

For a comprehensive overview of what is expected in transdisciplinary research undertaking, download an example of the Research Concept Note by clicking on the icon on the right.

Project Funding

The European Union's Intra-ACP academic mobility scheme promotes cooperation between higher education institutions (HEIs) and supports mobility in Africa, the Caribbean and the Pacific (ACP) regions.

The programme is implemented and managed by the Education, Audiovisual and Culture Executive Agency (EACEA) of the European Union.

The intra-ACP academic mobility scheme provides support to:

- * higher education institutions to set up inter-institutional cooperation partnerships between universities from different countries within the ACP regions;
- * individual students, researchers and university staff to spend a study / research / teaching period in one of the countries within the ACP regions. The Intra-ACP programme builds on the African Union's Mwalimu Nyerere programme for Africa, granting additional funding, and setting up a similar scheme for the Caribbean and Pacific regions and is funded through the European Development Fund (EDF).

The University of Ghana (UG), the premier university and the largest university in Ghana, was established by Ordinance on August 11, 1948 as the University College of the Gold Coast for the purpose of providing and promoting university education, learning and research. By an Act of Parliament on October 1, 1961 (Act 79) the University College gained independent status to become the University of Ghana, with authority to award its own degrees. The UG's mission is to develop world-class

human resources and capabilities to meet national development needs and global challenges, through quality teaching, learning, research and knowledge dissemination. UG offers degrees in a range of disciplines including, Medical, Agricultural and Natural Sciences, Arts and Social Studies, at Diploma, Masters and PhD levels.
